

# **Keyword Fighter 4.0**

– by WebFighter

# How it Works?

Keyword Fighter is a custom software made with WinAutomation that scrapes thousands of profitable keywords with the click of a button. It does so by extracting keyword suggestions from websites like Google, YouTube, Amazon, eBay, Bing, Yahoo among others.

A screenshot of a Google search interface. The search bar contains the text 'warriorforum'. Below the search bar, a list of suggestions is displayed: 'warriorforum', 'warriorforum wso', 'warriorforum rank builder', 'warriorforum down', 'warriorforum.com/forum', 'warriorforum war room', 'warriorforum kajabi', 'warriorforum scrapebox', and 'senuke warriorforum'. At the bottom of the suggestions list, there are two buttons: 'Google Search' and 'I'm Feeling Lucky'.

As you can understand, these websites will only show those keywords as *suggestions* that get a descent amount of searches on these websites.

Furthermore, you can uncover a whole new range of niches (really!) and keywords that you otherwise would never have discovered with tools like [Google Keywords tool](#) or the [YouTube one](#).

The possibilities to use these keywords is only limited by your own imagination. You can use the YouTube keywords in your tags to get instant views. Or use the extracted keywords in your articles or websites. Put these keywords in a competition checking tool and you'll find a lot of gold pieces in there!

## Using Keyword Fighter

The power of Keyword Fighter lies in its simplicity. The user-friendly extraction wizard makes sure that the non-techie's are not left behind in the dark.

Also, the software works in complete background. Meaning you can do whatever you want to while it scrapes tons of profit sucking keywords for you!

- Start Keyword Fighter by opening [Keyword Fighter 4.0.exe](#).
- Select the website you want to scrapes keywords from.
- Enter your seed keywords in the appropriate field and press OK.
- Wait before you get a message telling you how many keywords were scraped.
- Save the extracted keywords at a location of your choice.

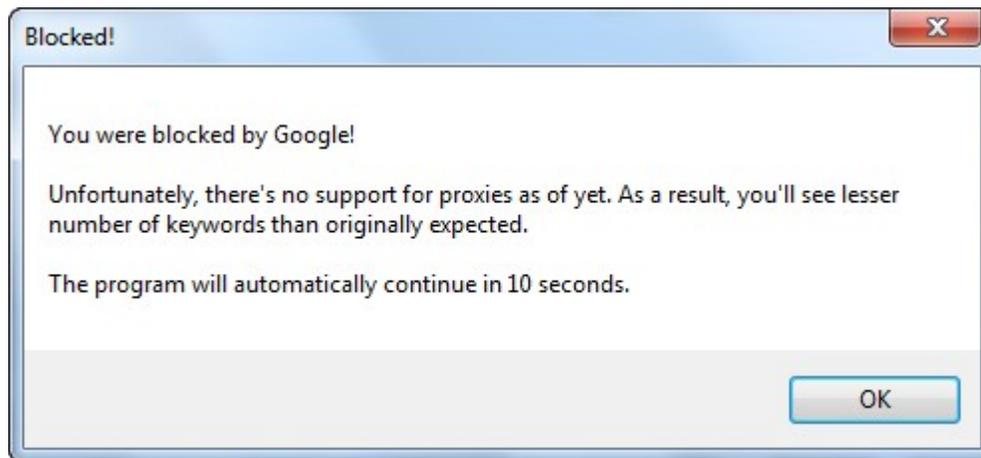

And that's all it takes!

Easy, right?

# IP Blocking

Sometimes, a website can block you for automated queries. Google is most aggressive on blocking and some websites do not even care!

When you're blocked, you'll see a message like below:

When the program encounters this error, the program will continue to save already scraped keywords. To change your IP, you can simply reset your modem and start scraping again. If you don't have a dynamic IP, you can consider investing in a dynamic VPN (Virtual Private Network).

# The “+” Operator For Google

You can also use a wildcard “+” in keyword fighter when scraping suggestions from Google.com.

For example, when you put in “how+ acne” in Keyword Fighter, it scrapes the following keywords:

```
how to get rid of acne
how to get rid of back acne
  how to prevent acne
    how to treat acne
      how to clear acne
        how to cure acne
how to get rid of cystic acne
  how to get rid of chest acne
    how to get rid of body acne
      how to get rid of redness from acne
```

That is, keywords starting with “how” and ending with “acne”. Using this feature effectively can give you never sought after, extremally profitable long tail keywords!

This feature is completely unique to Keyword Fighter and completely blows away even the softwares that charge \$80 per month!

# Support and Requests

If you have a specific request or you want some website to be added in Keyword Fighter, feel free to email me and I'll see what can be done :)

Note that Keyword Fighter has come a long way ahead due to suggestions from past customers. So your feedback is extremely valuable to me!

Also, let me know if you're having difficulty using Keyword Fighter and I'll try to solve the issue ASAP.

Make sure that you include your transaction ID if you contact me from an email other than your PayPal.
