

Snoob's Guide to Earning Money with Movie/TV/Games Sites Using CPA Lead & Some

Index

The Method

Choosing Your Niche

Making your gateway look good and making it convert

YouTube Secrets

Monetizing the Traffic

Before you start:

Keep in mind [CPA LEAD](#) loves websites with games, movies and entertainment. If you don't have a CPA Lead account, you must first create a website before applying.

Once you have a good looking website, [Apply for CPA Lead](#).

The Method

Instead of submitting 200 porn videos per day we are going to submit maximum 2-3 videos per day that get real traffic and rank high in YouTube searches.

You have to offer in your videos something that can be downloaded, watched and that is very searched for on the internet. Example are PSP

games, movies and TV shows. Then lure the visitors into visiting your page and wanting that program or information so badly that they will answer any survey you pop at them. Why not? These surveys are free and it only takes about a couple of minutes to complete. Once that is done, they can watch, download movies and games for free that costs them nothing.

What you want to do is make a simple video that you can put your link or domain in. A simple slideshow and music using Windows Movie Maker can do the trick.

You could go ahead and post your videos on other websites , but in my personal experience those viewers converted much lower and my videos hardly got any views so I didn't really get much visitors.

Example of a video of mine:

<http://www.youtube.com/watch?v=UKV7NrgJbHw>

Choosing Your Niche

First of all you need something fresh and not saturated. The following are a good list of niches I like to exploit with my method:

Movies /TV Shows

Games/PSP Downloads

Antivirus programs and newer versions of them

Cracks and Hacks

Within those niches, there are hundreds of thousands of topics. Every week a bunch of movies that come out, new games are released and new cracks and hacks for those latest games and programs are searched for insanely.

For example:

I post on YouTube saying that since the movies are like 2-3 hours long (research how long it really is) it's more convenient for them to watch them in HD on my website and all in one part , rather than cheap quality on YouTube and watching it in 20 parts. There are probably hundreds of other excuses you can use, although always make it look as if it's to please the viewer.

You can also claim you have a hack for some super big program and then just watch the amount of traffic you're going to get.

The programs and games niches convert incredibly high (1:2 – 1:6)

Making Your Gateway Convert

If you're using Wordpress blog for your site, put the CPA Lead gateway code on the post page. I found out that if you put the gateway code on the homepage, you have no chance to entice the visitors if the popup came too sudden. Let them look around the frontpage and see what movies you offer, then when they click on the movie, thats the time where the survey should go. This way, once they are ready to view the movie/games/download they will be prompted with a survey. They

complete this survey and you can earn money (\$1 - \$2 per survey).

On CPA Lead, remove the close button (recommended) when you are making your gateway prompt. Remove all possible links that might make the visitors close the prompt.

Getting Your Video Popular

THIS IS THE MOST IMPORTANT PART OF THE WHOLE EBOOK. If you do not get a good video with many views your work doesn't get as much leverage and so that means smaller profits for you. READ EVERYTHING HERE!!!!

I put myself in the place of YouTube and thought of measures the take to prevent tricks to get many views, my findings were incredible.

I use Windows Movie Maker to make my videos, very easy to use. The music in the video has to be stimulating, I usually put some techno. Also the music cannot be copyrighted or YouTube will eventually delete the video due to the request of the record company , I've lost out on thousands of dollars because I did not see this coming , many of my videos getting 300+ views per day got deleted. Use beats or something, you can find these on Google or torrents or make your own on newgrounds.com, I suggest your save your Windows Movie Maker template so that you can speed up the process of making videos in your niche.

For the title, name it on your video before you upload it to YouTube. The description has to be INSANELY long, don't overstuff it with keywords or the bots will catch on. Add links to other websites such as IMDB for a movie release etc... Good videos have outbound links to give

the viewers extra information, so we will do the same.

The good videos always allow the viewer to rate and comment their videos, so will we.

Stuff the tags like there's no tomorrow.

Now have some extra YouTube accounts ready. Once your video goes public, wait until your video has around 3-5 views and then go rate it and favourite it. If you're the first viewer after 3 seconds and you rate it 5/5, favourite it, comment and subscribe all at once the bots catch on RIGHT AWAY and you lose points on your rank.

20-30 minutes later go comment it and subscribe with a different account. DO NOT go subscribe and comment right after you've rated and favorited because like I said, the bots will catch on. YouTube has a VERY advanced protection script, they are owned by Google.

After this go rate, comment, subscribe or favourite it with different accounts every 1 hour or so continually for 4-6 hours. This tells YouTube that a high ratio of visitors that come to your video like it and are posting feedback on it and are discussing it, thus resulting in a high ranking.

When posting another video a few days later, use this account. By now it will be a little aged, have subscribers and many profile views, a good candidate to post a video.

YouTube check's how long you viewed the video, watch the whole

video AND THEN rate, comment, subscribe or favourite it. Yes that's how advanced the YouTube scripts are in my opinion.

Now please keep in mind that this is just some techniques I have seen that have helped me A LOT with my videos, but I can't say for sure that the YouTube script works like this as I don't have never seen their source code

Monetizing the Traffic Afterwards

Remember that even though they have answered the survey from CPA Lead they are still looking for that download/movie you promised. So make sure you are delivering what your saying or you will get yourself into a lot of trouble. And most of all, if you make your visitors happy, they will come back to visit your site and fill up more surveys from you, earning you more money and also, they might tell their friends about your website.

Also, you can get banner ads at the same time for more money. [Apply for Graboid](#) and put their banner ads there. Graboid pays you when someone downloads their P2P program where they can get the movies they want. Graboid has a free trial that is why they convert good. They pay \$0.7 for every free install of the program. Not bad really. Best of all, its a legit program and not a virus.

Graboid is hard to get into their affiliate program. They require of a minimum 50k unique per month on your site. But if you apply using my affiliate link, I can help you get inside and start earning from them.

All the best,

Supernoobice

Thank you for purchasing [MovieSitePress](#)
