

# PHPMyVideoBlog

V3

www.PHPMyVideoBlog.com

## FIRST STEP – INSTALL WORDPRESS

1. Download wordpress-3.X.zip here: <http://wordpress.org/latest.zip>
2. Unzip the file wordpress-3.X.zip.
3. Upload all files to your server.
4. Access your blog.
5. Install the wordpress normally, follow the wordpress instructions.

## SECOND STEP – INSTALL MYVIDEOBLOG PLUGIN

1. Unzip the file myvideoblog-3.X.zip.
2. Upload the directory “myvideoblog” to the plugins directory of the wordpress:
3. wp-content/plugins/
4. Go to wordpress admin. Click on Plugins and activate the plugin PHP MyVideoBlog.
5. Ok. You have installed MyVideoBlog!
6. Now, click on MyVideoBlog.
7. This is the admin page of MyVideoBlog, in this page you can add the feeds.

## UPDATING YOUR MYVIDEOBLOG

1. Go to wordpress admin. Click on Plugins and deactivate the plugin PHP MyVideoBlog.
2. Delete the directory “myvideoblog” from the plugins directory of the wordpress.
3. Now, upload the directory “myvideoblog” with the new files to the plugins directory of the wordpress.
4. Go to Plugins in your wordpress admin and activate the plugin PHP MyVideoBlog.
5. Ok. You have updated your plugin!

## MVB SETTINGS

- Go to MVB Settings and configure your preferences.  
You have two options to “design” your automated posts. Using the Post Template in the MVB Settings or directly in your wordpress theme. In this page you can see the supported tags to use in your template.

## AUTO-UPDATES

- Go to Auto-Updates Settings.
- You have two options to run auto-updates. Via Wordpress Schedule, this way your blog will be update when the first visitor access your blog after the time scheduled. Via Server CronJob, this way your blog will be updated using the cronjob feature of your hosting.
- Get more in information in the MVB Forum:  
<http://www.phpmyvideoblog.com/forum>

## FIRST UPDATE

- To start with some videos, just add some feeds and run the manual update!
- Let’s go! Add some feeds, this part is easy, just choose the provider, keywords, maximum amount of videos to catch, the category and the weekdays for this feed be updated.

## MVB TIPS

- Be careful with the amount of feeds that will be used and the amount of videos for each feeds. Several posts per day is not good to your blog and your server.
- If you are getting “**Fatal error**: Maximum execution time of 30 seconds exceeded”, you need to decrease the amount of max videos per feed. Or if you have access to php.ini, you can increase the maximum execution time. This will depend of your server.

## IMPROVING YOUR VIDEOBLOG

There are several plugins to improve your Videoblog. This is a list of plugins that I use in my own blogs:

- **WP-PostRatings:**  
Adds an AJAX rating system for your WordPress blog’s post/page.  
<http://www.lesterchan.net/portfolio/programming.php>
- **Sociable:**

Automatically add links on your posts to popular social bookmarking sites.

<http://push.cx/sociable>

- **Google XML Sitemaps:**

This plugin will generate a sitemaps.org compatible sitemap of your WordPress blog which is supported by Ask.com, Google, MSN Search and YAHOO.

<http://www.arnebrachhold.de/redirect/sitemap-home/>

- **All in One SEO Pack:**

Out-of-the-box SEO for your Wordpress blog.

<http://semperfiwebdesign.com/>

- **Uniquefier:**

This plugin will turn your blog content from duplicate to unique. All it takes is 1 single click to activate the plugin and everything will be 100% unique content.
