Squeeze Domination
Get More Optins. Guranteed.

Thank You for purchasing Squeeze Domination! We know you'll enjoy everything that is included in Squeeze Domination, and we are here to help if you have any problems or concerns.

As you know all of the following was included in your purchase:

- **30 Page HTML Templates**
- **All 30 Template PSDs**
- **SD Squeeze Page Plugin**
- **SD No Exit Plugin**
- **SD WordPress Optimizer Application**

Anyways, the plugins are pretty self-explanatory when it comes to installing and activating them. The SD No Exit plugin functions as an exit popup when people try to leave your site, and the SD Squeeze Page plugin allows you to build your own squeeze pages within WordPress.

The html templates are a little confusing to edit and upload, but I recommend using a html editor like KompoZer. You can also checkout our support desk for more information with this.

With the SD WordPress Optimizer Application, it is important to keep in mind it is an application meaning that its address

will be the same as your site name. Thus, I recommend installing it on a subdomain, and reading the guide in our helpdesk.

Anyways, if you don't want to go through the hassle of uploading it, you are always free to use ours. However, keep in mind that that is the case for all Squeeze Domination customers. So here are the login credentials for our SD WordPress Optimizer Application (Please do not share this):

Login URL:

http://squeezedomination.com/sdwpo/WPOptimizer/WP%20Optimizer/WP%20Optimizer/

Username: Squeeze-Domination-Customer-3602012

Password: B78gy43qwkd96c0

In conclusion, I wish only the best for you and your website. I, as well as whole Squeeze Domination team are here for support. Don't hesitate to contact us for any reason, as we will be more than happy to assist you.

Sincerely,
