

WP PicPoll

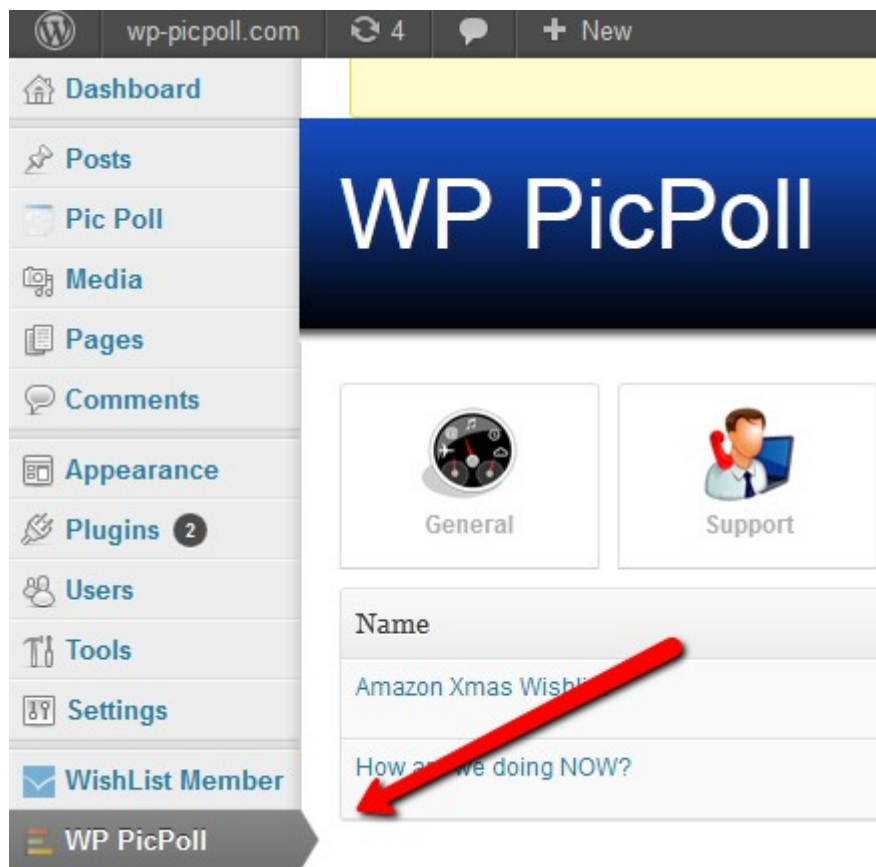

Hello and Congratulations!

You have made a fine decision to add WP-PicPoll to your arsenal of tools to increase productivity in your business!

The following content will familiarize you with the features and flow of your new plugin.

WP-Pic Poll was specifically created with YOU, the user in mind and therefore it is Super Easy to use...

So Let's Get Started NOW...

After installing your plugin into your Word press site, you will notice that there is a new tab that will show up in the (left) hand side of your dashboard that will read WP-PicPoll. When you click on that you will be presented with the Main Dashboard area of the plugin.

This is where we will create our 1st poll... simply begin by adding:

#1 Name: This is The Name that you will give your Poll and will be displayed on the Top of the PicPoll template when published..

#2 Title: This will be a secondary way to let your Poll participants know what your Poll, Quiz or Contest is all about.. -This will also be what you will see when placing a (poll) into your Posts/Pages in the form of an Icon with a drop Down menu with all priorly created {shortcodes} -poll- More on that in a moment...

#3 Font: In this section you can indicate the type of font you prefer to use when creating this instance

#4 Font Size: Here you can indicate the Size of font you prefer to use when creating this instance

#5 Font Color: Here you can indicate the type of Font Color you prefer to use when creating this instance

#6 Background Color: Here you can indicate the type of Background Color for your template when publishing this (poll) instance.

#7 Voting System : Choose how many hours to Pass before participant can Re-Vote or Participate in this instance (poll) ... Can be any amount of (hours) you choose... -PLEASE NOTE.. If you leave the default -0- left in place it will only allow visitor to only participate a single time in the (poll) created.

#11

Next we will add our choice of:

#8 Image Text: This will appear under your Image in the template created when making this poll

#9 Image URL: Here you can choose to add a URL OR you can browse your system and use any image you like.

#10 Image Link: This is where we will add our REDIRECTION Link... This is best used when you add a link that is associated with the answer given by the participant of your (poll) for eg. You create a poll that will ask visitors to Vote on their Favorite Type of Soap.. Perhaps. “What type of SOAP is your Favorite..” then have 3 different selections of (types) of soaps available... so if the participant might answer Type #1 (Green Soap) then you send them to a URL that relates to that specific answer that is indicates... and it continues from there.. If participant chooses answer #2 (Yellow Soap) then you would insert a specific URL that relates to the needs or wants of the (Yellow Soap) consumers...

After you are finished with this part of the process, you can simply click on the small GREEN Icon (**#11**) located at the (bottom Right) of your dashboard to repeat the above mentioned procedure to add more (Answers) for your desired (poll) implementation. This can be repeated again and again in order to best fit your idea.

When you are finished making your (poll) just the way you like, you simply click on the Upper Right Hand tab the reads (Create a Poll) (**#12**) ... This effectively produces AND saves your (poll) .

This newly created (poll) will now be present in the most upper area (**#13**) of the plugin , all other instances of WP-PicPoll you create will populate this area as well...

You can easily choose to inspect or edit any of your polls from here..

Another possibility is to -copy- your desired shortcode from here in order to

Publish it, OR you can choose to enter within the individual creation of a Post/or Page the desired (poll) you choose. This is done by clicking in the NEW Icon

(#14) you will see in your default WYSIWYG editor, and choosing the name of the desired (poll) to enter into your page/post.

You are now 100% READY to Publish your new (poll) :-)

From here you can choose to :

- Post in a default Post/Page in your present content and pages...
 - Publish in the PicPoll Custom Templates we have provided for you..
 - Post to Facebook
-
