What is This All About?

Simply put, Backlink Booster does exactly what it sounds like. It boosts the raw power of every single backlink you create for your site by a massive factor with just one click of a button.

If you buy any of the popular backlink packages from Angela Edwards or Paul Johnson or any of the excellent providers of backlink packs. Or even if you are finding your own backlinks then you know how powerful these links can be for your future success.

However, I am a pure SEO geek and I realized that there was a massive opportunity being missed here. So I put on my Dexter hat and proceeded to spin the propeller until I came up with a simple to use way to apply a tactic I was already using with my own backlink building into an amazingly powerful and easy to use “One Button” approach for everyone else to use.

I have been using this technique myself for months and have seen fantastic jumps in ranking using the Backlink Booster script I am sharing with you in this product.

In our experiments we have seen the value of each backlink jump by 1000% or more, which means you are getting more link juice and power from every link without risking getting your site Google slapped.

Not only that but we store all your URLs so you can import them into any automated bookmarking software such as Bookmarking Demon, Social Bot or whatever you want for even more power...

A few marketers in my close inner circle have experimented with this script themselves and have been amazed with the results they have seen... now it's your turn!

How Does It Work?

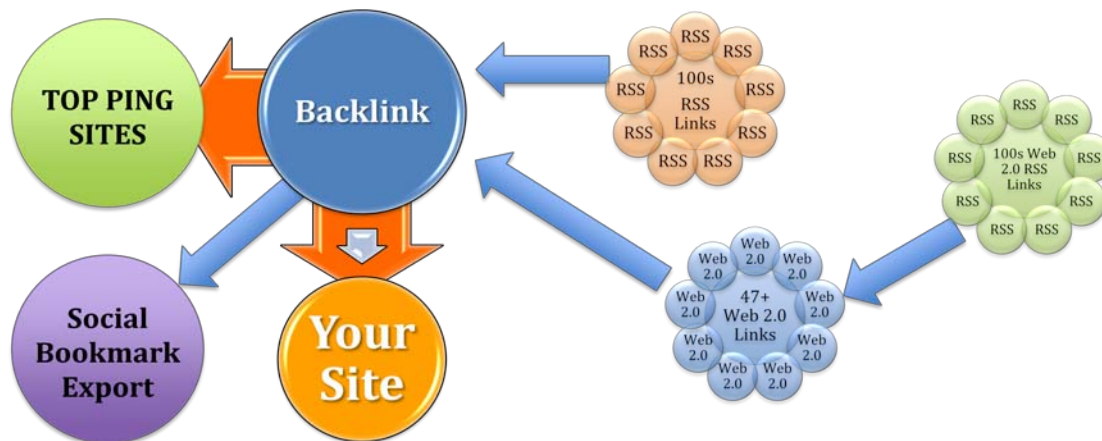

Well, there are several aspects to the Backlink Booster system. We have a script that lives on your website that acts as a receiver for information from the infamous “Boost It!” button we are going to show you in just a moment.

When ever you create a backlink from a backlink pack or from any link you want, such as an article, etc. , you just push the “Boost It!” button and it sends the information about that link to the Backlink Booster script on your site.

This script then gathers some information about the link, very much like a search engine spider. It validates the data and then stores it for later.

Once it has done that it then pings the link to popular blog search engines so that your backlink gets indexed fast in the search engines.

This is just the beginning of the magic...Next, the system creates an RSS feed of all your backlinks you have registered with the system and this RSS feed gets sent to 100s of RSS directories giving each backlink 100s of inbound links as shown below.

These backlinks then pass that entire link juice to your site without risking your site for backlink overload. Each one of these backlinks acts as a shield and a filter for all this extra link juice.

MIN

MAX

Backlink Booster

Not only that, we show you how to get tons of high PR Web 2.0 links to your backlinks as well, accelerating your backlinks worth and raw power to even greater heights!

As an extra feature we also export a list of your “Boosted” links so that you can import them into Bookmarking Demon, Social Bot, SENUke or any other automated social bookmarking or promotion tool you may want to use.

This gives you unbelievable backlink power and unlimited SEO potential for your site without ever risking your site as none of these links ever point to your site, only the backlink you created.

We are basically creating a link-building firestorm for your site that all happens with just a single click of a button on 100% autopilot ensuring that every single backlink you create is pure bloody SEO gold.

MIN

MAX

Backlink Booster

First Things First – Watch The Setup Video!

We have included a full “Setup” video for you to follow as we install, configure and test the Backlink Booster system for you.

This is located in the resource folder and to view it all you need to do is open the file “**setupvideo.html**” in your browser. This is a streaming video from our servers so it may take a moment to start playing for you.

It walks you through a demo install on one of our test sites and helps you see the entire process step-by-step so that you can follow along and setup this system on your site.

The All-Powerful “BOOST IT!” Button

This is the all-important button that makes the magic happen. Basically, it's a glorified bookmark on your browser that sends information to your script on your site.

To get this button installed open up the file called “Boostit.html” in your browser. You will find this in the resources folder.

To install this in your browser just follow these steps:

Step 1: Open the file “Boostit.html” in your browser (this is in the resources folder)

Step 2: Drag the button to your bookmark toolbar on your browser

Step 3: Right click on the “Boost It!” bookmark and select “Properties”

Step 4: Change “yourdomain.com” to your actual domain where you installed this code.

Step 5: Change the skey to a secret key that you will use later. Write this down as you will need it for the installer later.

The image displays two side-by-side browser bookmark property dialog boxes. Both dialogs have the following fields and controls:

- Name:** A text box containing "Boost It!".
- Location:** A text box. The left dialog shows `href='http://yourdomain.com/blb/?skey`. The right dialog shows `1.com/blb/?skey=YOURKEY&title='+encd`.
- Tags:** A text box containing "Separate tags with commas" and a dropdown arrow.
- Keyword:** An empty text box.
- Description:** An empty text box.
- Load this bookmark in the sidebar:** An unchecked checkbox.
- Buttons:** "Cancel" and "Save" buttons at the bottom.

That's it, your all-powerful “Boost It!” Button is ready for use...

Installing The Script

This script is pretty easy to install and once done it is easy to configure. We have actually included a video on how to install this using Hostgator but you can follow these basic instructions to get going really quickly.

If you have trouble with this we do offer an installation service for \$40, this does not include profile setup or RSS submission, just the install of the script itself. Just contact us at <http://themanicmarketer.com/support> and we will hook you up!

Detailed Installation

First, if you have not done so, watch the video and install the “Boost It!” button as described in the last section. It will help explain what we are doing and why.

Basic Requirements

A Webhost (preferably Linux)
PHP 5 (with DomXML, Curl)
MySQL 4+

Step 1 – Create a MySQL database with your host (if needed)

You can skip to Step 2 if you already have a database setup for your site, for example if you are using Wordpress or Joomla as this script plays nicely with those systems without any conflicts.

This step depends on how your web host is set up. Most hosting control panels allow you to create a MySQL database.

For example, on Hostgator and all Cpanel hosts you should see something like this when you log into CPanel:

Just click on the “MySQL Databases” button and create a database as shown below:

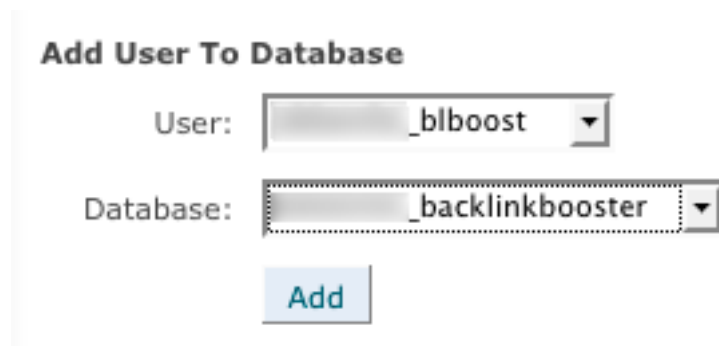

Now create a User for the MySQL database and give it a strong password. Make sure you write this down for later.

MySQL Users

Add New User

Now that you have a “database” name and a “database user” we have to link them together. To do that, look for this section in CPanel.

Note: I blanked out the prefix for privacy. You will have a prefix with your Cpanel account username, etc. This is now part of your username and database name.

Add User To Database

User:

Database:

Now all you have to do is set the privileges for this user on this database. Set them to “all” as show below.

Just press the “Make Changes” button and your all set! Just make a note of your database name, the database username and your password.

For most people the “Database Host” is localhost but some hosts have different settings. For example GoDaddy will give you a special Database Host URL. If you are not sure then contact your host and they will help you create your database.

Step 2 – Upload the “blb” folder and license key to your server

You need to upload the “blb” folder to your website using an FTP client. Your host will have given you a FTP username and password when you set up your hosting and if you are not sure what that info is, contact your host.

If you need a FTP client then you can get Filezilla from <http://filezilla-project.org/>, which has a FTP program that works on both PC and Mac.

You need to upload the “blb” folder to the root of your website. This is so that the path to this folder is as follows:

<http://yourdomain.com/blb>

Also, upload your license key into your “blb” folder as the system will not work without your license key in place.

If you cannot find your key, check your download link and it should be there so you can re-download it.

Step 3 – Run the installer “install.php” and follow the instructions

Just go to <http://yourdomain.com/blb/install.php> where yourdomain is your actual domain and follow the prompts.

Backlink Booster V1.2 - Installer

Database Connection Details

Insert your database details here, if you are unsure what these may be or have not created a database yet, refer to the manual.

Database Host:	<input type="text" value="localhost"/>
Database Username:	<input type="text"/>
Database Password	<input type="password"/>
Database Name	<input type="text"/>

RSS Information

This is for display purposes for your RSS feed that we will spread throughout the web. Keyword loading this helps add some extra power to the links for your site.

RSS Title	<input type="text"/>
RSS Description	<input type="text"/>
RSS Link	<input type="text"/>

Secret Key

This is used to stop anyone else using your Backlink Booster and is the same key you set in your “Boost It!” button.

Secret Key	<input type="text"/>
------------	----------------------

[Start The Installer](#)

There are 3 sections to this installer and we need to fill in the details as follows:

Section 1 – Database Connection Details

The first is your MySQL data which you either created in step 1 or already have.

You will need your database host, username, password and the actual name of your database where you want to install it to.

Section 2 – RSS Information

The second section is for the RSS feed that this system will create. You will need to give your Backlink Booster RSS feed a title, description and the URL of your website.

Ideally you want to include your top keyword in the title as well as the description. This helps add a little extra go-go juice to the power of your boosted backlinks.

For example you could have:

Title: Widget Websites of Interest

Description: We Think Widgets Are Cool, Apparently These Hot Websites Do To.

Then just put in the domain of your website for the RSS link.

Section 3 – Secret Key

This is the secret key you created when you setup your browser's "Boost It!" button. This creates a layer of security between your button and your Backlink Booster so that no one can use your system with their own "Boost It!" button.

Once you have entered all this data, your done and can press the "Start The Installer".

If all goes well then you should have a success screen. If not, it will tell you what went wrong and how to correct it.

Once you have run the installer successfully delete the install.php file and change the permissions on the folder "blb" to 755 in ftp.

You also need to set the permissions of config.php to 644 and the permissions of log.txt to 777.

Finally, rename the file htaccess.txt to .htaccess to protect your site install of Backlink Booster.

Step 4 – Test the “Boost It!” button!

Now, you should have already installed the “Boost It!” button on your browser. Just go to a page that already links to you and “Boost It!”. If everything worked fine you should see a page like this:

Backlink Booster

Boost Your SEO and Each Backlink's Potential Value

Checking Data For Your Link...

Title: Steven Hughes's Profile
URL: <http://www.explorewww.com/user/Nabbit/6>
URL Check: URL Responded As Expected

Confirm The Links Information

Title:	Social Search Engine – ExploreWWW
Description:	Social Search Engine, ExploreWWW is a social search engine that enables you to find information contributed by twitter users.

Recommended - 200 characters or more and use your keywords where possible

Let's Rock >>

Powered By **Backlink Booster** From <http://themanicmarketer.com>
Copyright 2009, All Rights Reserved, The Manic Marketer.

Once you confirm the title and description are as you like it you can press the “Let’s Rock” button to confirm it.

I recommend that you try and put your keywords in the title and the description somewhere for a little extra SEO boost, but it’s up to you.

Once you press the “Let’s Rock” button it will save the data to the database, ping it to the most popular blog search engines and save the data to a text file so that you can import it into a social bookmarking program like Bookmarking Demon or Social Bot, etc. It will look something like this:

Backlink Booster

Boost Your SEO and Each Backlink's Potential Value

Adding Link To The Database For Promotion

URL: <http://www.explorewww.com/user/Nabbit/6>
Title: Social Search Engine - ExploreWWW
Description: Social Search Engine, ExploreWWW is a social search engine that enables you to find information contributed by twitter users.

Saving URL To URL List for Import To Social Bookmarking Systems

URL File: 2009-11-03-urls.txt

All Done... That Backlink Was Officially Boosted!

Powered By **Backlink Booster** From <http://themanicmarketer.com>
Copyright 2009, All Rights Reserved, The Manic Marketer.

With the latest versions of Backlink Booster you also have additional options with your boosted link. Including the ability to use OnlyWire to automatically social bookmark your link for even more power.

This is a fully automated Social Bookmarking service that is either free (ad sponsored) or \$2.99 a month, which is a bargain for what it does.

There is some cross over with the 30+ accounts it supports with Ping.FM (more on this service later). So just signup with the main Social Bookmarking sites if you set up an account there.

We will talk about this more in a few moments 😊

Now we can check our new backlink RSS feed by visiting this link:
<http://yourdomain.com/blb/blbrss.php> where yourdomain.com is actually your domain name.

If all went well then you should have something like the RSS feed shown on the next page.

[FeedAgg.com | The Best Blogs and Feeds on the 'Net – Beta](#)
November 2, 2009 7:38 PM

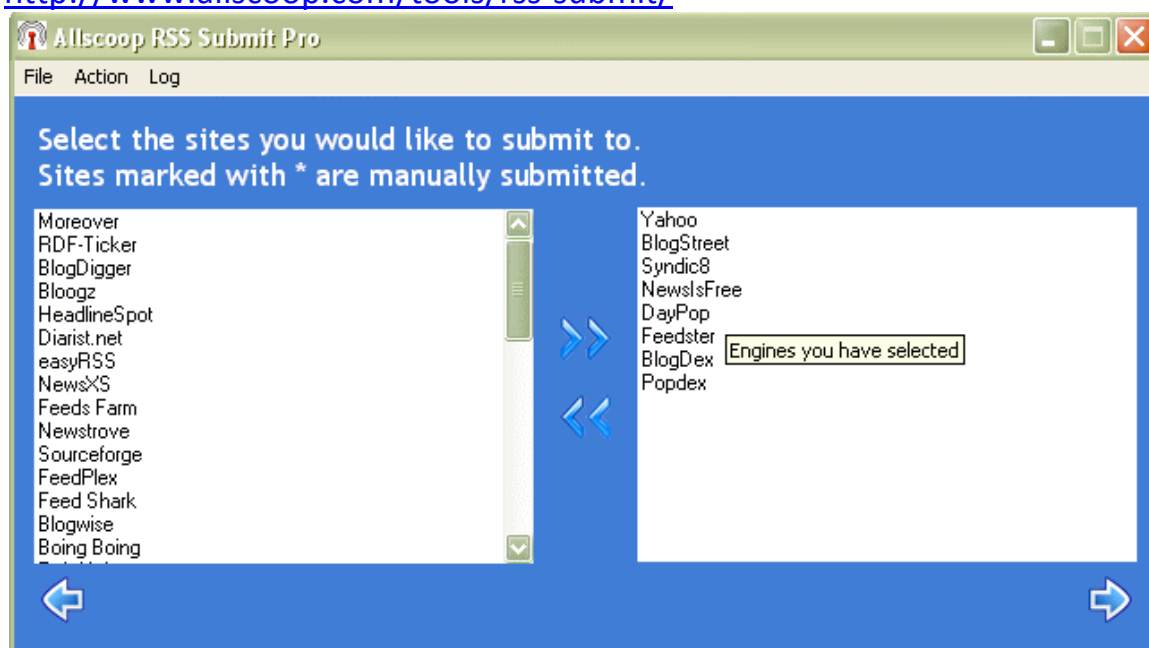

Ok, now that you have your RSS feed we need to submit it to all the RSS directories we can to get our automatic backlinks. Now you can automate

this with one of my favorite tools [RSS Submit](#) from KSoft, which allows you to submit your RSS feed to over 80 different RSS directories automatically.

It is a great piece of software but it is pretty expensive at \$114 for the SEO pro version. It is something you should invest in if you are serious about your marketing efforts.

However, I just came across this cool little tool that submits your RSS feed to many sites for free. It does not have as many directories as RSS Submit but it's a good starting point for a free tool.

<http://www.allscoop.com/tools/rss-submit/>

I have also provided a powerful list of RSS directories you can submit to at the end of this guide for free and there are a few rss directories on my list that are not on the AllScoop RSS submitter. You only ever have to do this once for your boosted site.

What If I Want To Install This On Multiple Websites?

Sure, you can do that if you want to. However, you will need an extra license for each domain you install this on.

You can purchase extra site licenses from here:

[Backlink Booster Extra Licenses](#)

However, I want to share a quick tip to save time with all your RSS directory submissions.

I usually create 1 set of accounts per niche I am targeting. However, if you want to, you can combine groups of RSS feeds into one single feed for all your sites using a site called RSSMix.com.

Basically, you gather all your Backlink Boosted RSS Feeds and combine them into one feed as shown below.

The screenshot shows the 'RSS Mix' RSS Aggregator interface. It has a red header with 'RSS Mix' in white, and a black sub-header with 'RSS Aggregator' in white. Below the sub-header is a navigation bar with four tabs: 'Home', 'RSS Parsers', 'UK RSS News Feeds', and 'News Box Wizard'. The main content area is titled 'Create a New RSS Mix' and contains the following text: 'Mix any number of RSS feeds into one unique new feed!', 'You can then point a [parser](#) at the new feed and display a mix of stories from [various sources](#) on your website.', and 'To create a new RSS Mix, copy and paste the URLs of the existing source feeds into the box below and hit **Create!**'. Below this text is a large text input box containing five example URLs: 'http://yoursite1.com/blb/blbrss.php', 'http://yoursite2.com/blb/blbrss.php', 'http://yoursite3.com/blb/blbrss.php', 'http://yoursite4.com/blb/blbrss.php', and 'http://yoursite5.com/blb/blbrss.php'. To the right of the input box is a 'Create!' button. Below the input box is a link: '[[Click here to add 4 random feeds to the box above](#)]'.

You would then submit the combined feed to all the directories and this can save you hours of work!

RSS is Good But Can We Get Some Web 2.0 Links Too?

Sure we can and this is a very cool way to get some very high PR links back to our backlinks and get that valuable link juice back to our site through these backlinked sites.

To do this we need to create an account with <http://Ping.fm> , which is a very powerful backlink building tool if you know how to use it.

If you have purchased my Supercharged SEO course, you know what's coming next ;) as this is one of my favorite little SEO tricks.

Basically, Ping.fm supports 47 social network sites and can cross post your content over to all 47 at once from one source. So you can post to Twitter, Facebook, LiveJournal, Wordpress.com and many more services all at once creating viral links and valuable Web 2.0 links.

Now, creating an account at each of these sites can take a while but it is well worth the time invested and you can do it in under an hour or two at the most. Make sure you set them up as "Blog" or "Microblog" in Ping.FM so that we can post to them correctly.

I recommend you make complete profiles with Bio's, Descriptions, Profile Pics, etc. This makes it look a lot less spammy and more authentic so your profiles don't get flagged for any reason.

Now I need to ask you a question, are you a hardcore backlinker or not. Because to get our feed into the Web 2.0 network we are creating here we have 2 options. One is with Twitterfeed, the other is direct posting.

For most people Twitterfeed is sufficient and gives us some nice options for posting, however, it can be restricted to posting 5 updates per 30 minute period.

Now for some people, 5 backlinks per 30 minutes is not enough. For example, people with multiple sites and even people who outsource their backlinking. Well, don't worry, we have a solution for you guys as well and if that's the case, you can skip the Twitterfeed part of this setup and jump to the next section, but you will have to go create the Web 2.0 accounts.

Now, once you have all the accounts setup we need to funnel our RSS feed into our Ping.fm account and we do that with another cool and free service called <http://Twitterfeed.com>.

Once you create an account with Twitterfeed we need to create a new feed. You should see a screen like this:

New Feed

Logged in successfully

Step 1: Send Feed to:

☐  Twitter

☐  Facebook

▼ Hide Services

☐  Laconi.ca

☒  Ping.fm

Your Ping.fm Application Key

To start, enter your Ping.fm Application Key above, and click on "Get Available Methods"

[Get Available Methods](#)

☐  HelloTxt

[Create Feed](#) [Cancel](#)

It will prompt you to get your Ping.fm application key and provides you with a link to go grab it. If you don't see if you can get it here:

<http://ping.fm/key/>

Just paste it in and click “Get Available Methods”. You want to select “Blog” this time and we are going to repeat this process to create a feed for “MicroBlogs” as well so that we hit all the accounts we have setup.

As you can see below, we want to make sure we check our feed to ensure it can be fed correctly to Ping.FM.

Ping.fm

Your Ping.fm Application Key

Get Available Methods

ping.fm method to update: **blog**

Continue to Step 2

HelloTxt

Step 2: Name Feed & Add Source URL

Feed Name

Internet Marketing Links

RSS Feed URL

http://.../blb/blbrss.php

☒ Active

Feed parsed OK

Now for some extra spicy “secret” sauce for squeezing a bit of extra power from this backlink boosting technique....

Click on the “Advanced Settings” below this box and we have a ton of extra goodies to fine-tune our feed and add some tracking for links.

First, leave the “Update Frequency” checking time alone but crank up the “Post Up To” to 5. If you feel you are getting too many links posted at a time you can turn it down to where ever you feel comfortable.

For the “Post Link” section I prefer to use <http://bit.ly> as it provides some fantastic tracking potential. However, it’s up to you. With bit.ly you do have to enter your API key, which you can get from your bit.ly profile.

Now, one thing to note is that shortened links from bit.ly do pass page rank as they are 301 redirects, so don’t worry about this.

Lastly, Twitterfeed allows us to use Google’s UTM tags for tracking purposes. You can then track these links in Analytics if you want to so you can see if you get any bonus traffic from these links as well as the actual backlinks.

Now, as I mentioned earlier, you need to repeat this Twitterfeed setup for “Microblogs” as well. This should only take a couple of minutes but it ensures all services get updated correctly.

Direct Ping.FM Posting

Ok, for you hardcore backlinkers (You know who you are) we have recently added a new feature that bypasses the restrictions of Twitterfeed.

All you need to do is make a small change to config.php using your ftp program and find this section:

```
// Enable direct PING.FM posting (Y/N)  
$pingfm_enable="N";
```

```
// Ping.FM API Key (you can get it from http://ping.fm/key)  
$pingfm_api="yourpingfmapl";
```

All you need to do is change:

```
$pingfm_enable="N";
```

To

```
$pingfm_enable="Y";
```

Next, you have to go grab your Ping.FM API key from here:

<http://ping.fm/key>

Then add it to this section, swapping “yourpingfmapi” for your real API Key. Remember to keep the quotes around it!

Now you are all set to direct post to Ping.FM without any restrictions.

Please note, we do both Micro-Blogs and Blog postings at the same time. So make sure your accounts are configured correctly (Blog type sites are “Blog”, Sites like Twitter are “Micro-Blog”, etc).

Automated Social Bookmarking

We have also added a really cool feature that allows you to automatically social bookmark every backlink you are boosting using the popular OnlyWire service.

Basically this is a free service (limited) or very cheap (\$2.99 a month) service that allows you to automatically Social Bookmark a site with a single click. So it seemed like a natural thing to add to our Backlink Booster.

When you boost your link you will see a new **“Submit This To OnlyWire >>”** link. Once you click that, you will be taken to Onlywire to select the accounts you would like to send the backlink to. Once you confirm that step, OnlyWire will go bookmark your link to all the sites it supports that you have configured accounts for.

There is some crossover with Ping.FM, however, focus on just the Social Bookmark sites that it supports and your all set.

For more information about OnlyWire [click here](#).

Web 2.0 Overload... Even More Power!

Ok, now again, I am going to share a powerhouse tip with you that I have kept to myself so far. In fact, as I write this I am seriously considering deleting this page from the manual, as this is really that damned powerful.

Well, as you are still reading this you can see that I decided to leave it in, but I want you to keep this to yourself!

I am going to show you how to make each of your Web 2.0 links even more powerful and push even more link juice to your site.

Every one of the Web 2.0 profiles you setup with Ping.FM has a RSS feed. All you need to do is gather them all up and feed them into RSSMix.com and combine them all into one feed.

Do you see where I am going with this? That's right, we are going to submit that feed to the RSS directories too and give all our Web 2.0 Profiles and links a dramatic boost as well. This is creating a virtual backlink explosion and your site is fully protected, as the link juice is all filtered through your backlink and these Web 2.0 profiles and not directly linking to your site.

This completely shields your site from any possible Google slap and allows you to create very powerful backlinks that boost your site dramatically.

Now you can see just how powerful Backlink Booster truly is!

So go boost your backlinks and get your site a ton of extra traffic and boosted rankings.

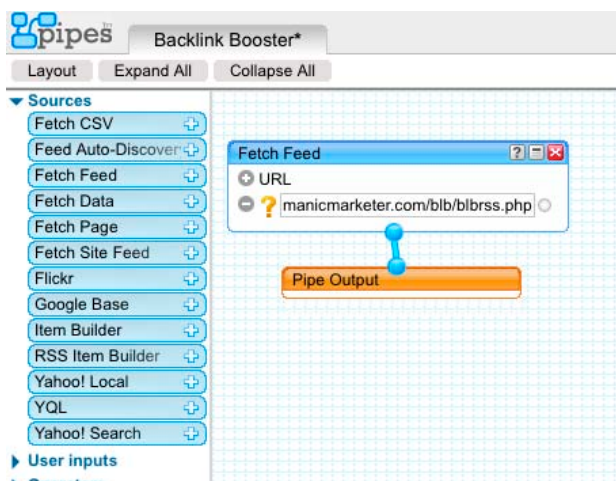

Triple Power Backlink Sandwich!

Here is another way you can dramatically boost the power of all your backlinks. In fact, you can boost everything you have done by another 300% or more.

This is the raw power and potential of this system and it keeps on getting better and better.

All you have to do is take your RSS feed and go create a new feed from RSS Mix. Just that one feed creates a new unique feed of backlinks you have created. Now repeat the promotion process (submit to RSS directories, the Twitterfeed - Ping.FM, Etc.) for this feed and you have basically doubled your backlinks to this backlink you created originally.

Now, go create an account at Yahoo if you don't have one and go to <http://pipes.yahoo.com>. Once you do just create a pipe like this one:

Once you are done, save it and run the pipe. You can then obtain the RSS feed for this pipe and PRESTO, you have another unique RSS feed to promote with the RSS directories and Ping.FM.

Of course, it may take a while to create all these RSS directory submissions and Ping.FM accounts but it's worth it. However, I have a way we can speed that up dramatically...

Speeding Up Account Creation Times

Creating accounts at all the RSS directories and Ping.FM supported social networks can be a pain in the butt.

That being said, you have seen how vital this is for this system to work and give you all that power.

Now, it only takes about an hour or two to create all these accounts to setup, but I want to cut that time dramatically for you and take some of the hassle out of applying these techniques so you can concentrate on building mega-powerful backlinks.

To do this we need a little bit of help from some form fillers. The first one I recommend is FREE and that's Google's Toolbar. This has a profile manager that is great for remembering commonly filled in info like emails, usernames, passwords, addresses, etc.

It is really designed to speed up common forms like signups and can cut your account creation times in half.

The other tool I recommend is Roboform if you are on the PC (or 1Password if you are on the Mac). Both of these tools are fantastic form fillers and have much more power than Google's toolbar and are useful tools to have in your marketing arsenal.

I believe both come with a 30 day demo. So you can try these out or just use them for this project, it's up to you.

Either way, this will save a ton of Copy and Pasting email addresses, names, addresses, etc and time saved is more time to boost your links!

Also, if you want you can outsource the entire process to somewhere like GetaFreelancer.com or MTurk.com. I have included a sample "project" posting and you can get all the accounts created for about \$20 on average if you want to save your time to do other things.

Other Applications For Backlink Booster

So now you have it all setup and know that you can use this when you are building backlinks, what else can we do with this?

Well, there are many ways we can use this powerful little promotion system. For example, are you an article marketer?

Every time you write an article you can press the magic button. This adds that article to your RSS feed and pings your article for you so it gets indexed and promoted with a ton of RSS directories and Web 2.0 properties automatically. Instant exposure and link love for Google.

If you know me then you know I am a very successful video marketer and my Video Assassin course is one of the most popular video marketing courses out there.

This Backlink Booster and the techniques I show here are one of the reasons I get so many visitors to my promoted videos. I just click the button when the video is published and watch the traffic flood in and the rankings skyrocket.

Maybe you have a guest post on a blog somewhere, if so “Boost It!”

As you can see, the possibilities are endless and the potential is incredible. You can pretty much promote anything you like at the touch of a button and it’s all automated once you have everything setup and in place.

All you have to do is press the “**Boost It!**” button.

Did You Know You Can Earn Up To 100% Commission On Our Products?

We want you to make money and we are willing to let you promote our incredibly popular "Special Reports" and keep 100% of each sale!

Not only that, you can promote this "Backlink Booster" product and earn 66% commissions that is paid instantly to your Paypal account.

You did read that correctly, that was not a mistake. You can earn up to 100% commission on select products for doing almost nothing each and every time you make a sale.

This is not MRR or PLR, just one of the best affiliate marketing offers you will ever see. We handle the sales, payments and customer service. You handle the profits!

All you need to get started is get your special link from the link below and start promoting with all the resources we have included in this pack.

Get your affiliate link here: <http://themanicmarketer.com/affiliates>

Not only that, we pay you instantly to your PayPal account. There is no mucking around, no wait periods and you keep up to 100% of the profits!

You maximize your conversions by offering an incredible package and getting 100% of the products price and not scaring potential customers with an expensive product and we offer incredible value for money in these very cost effective reports that have customers coming back month after month.

Excellent Resources For Backlinks

Ok, so we have a very powerful “Backlink Booster” so where do we get the backlinks to boost?

Well, I have you covered there too. Here are some excellent sources of backlinks that I use and are used by many others in the SEO industry as well.

Angela Edwards – Monthly Backlink Packs

The undisputed Queen of backlinks, Angela Edwards creates a set of 30 high PR links you can use every month and a bargain at only \$5 / Month.

http://angelasdiscountmarket.com/backlink_builder.html

Paul Johnson – Monthly Backlink Packs

Another excellent source of quality high PR backlinks. Paul create a link pack every month that you can use for your website. At only \$8/ Month you get 50 excellent backlinks every month.

He also offers a linkbuilding service which can create all the backlinks from his packs and Angela’s for you. Well worth the price if you are short on time.

Mark Dickenson – The Backlink Bully

Mark pulls no punches with his backlink product. He literally forces his way to get good rankings with his backlinks and you can too.

<http://www.warriorforum.com/warrior-special-offers-forum/111311-backlink-bully-how-i-grabbed-top-spot-google-270-000-competition.html>

Also, not to be outdone, I have included my “EDU Backlink Bonanza” Special Report in the Bonuses directory for you as well.

This report shows you how to get 1000s of those invaluable .edu backlinks for your website and allows you to get dramatic extra authority and rankings from these highly prized academic websites that Google loves.

Remember, backlink booster can be used with any of these backlinks and each link is dramatically magnified with the power of the “Boost It!” button.

This will save you a massive amount of time and effort to get ranked and helps you increase your traffic and ultimately your sales.
