

## Sample GetAFreelancer.com or MTurk.com Project Posting

I need accounts created for many Web 2.0 websites and RSS directories. There will be a total of approximately 100 accounts that need to be created for this project.

All accounts will be created with the same signup information and the list of accounts and signup data will be provided to the winning bidder upon projects start.

The project needs to be completed within 48 hours and future outsourcing opportunities may be available if we are satisfied with the speed and efficiency of the completion.

Thanks in advance and I look forward to working with you.
