

# Ping Automatic

## Installation Guide

Installing this script is really straight forward with the below step by step guide or with the video guide (see: <http://www.youtube.com/watch?v=SN7M8AeHiYE>), but if you would rather have us install it for you, just send a support ticket with your cpanel access info at <http://pingautomatic.com/support> and my programmer will install it for you for just \$6.

### How to Install It:

- a) Unzip the files and upload the "pingscript" folder to your Web Server
- b) Create a MySQL Database on your server and note down the Database Server Name/Address, Database Name, Database Username and Database Password
- c) Now you can visit the Installation URL to start the Script Installation
  - 1) Assuming the "pingscript" folder was uploaded to your domain's web root folder. Your installation URL would be: <http://mysite.com/pingscript/install/>
  - 2) Fill out the installation form by choosing a name for Admin account, Admin password and MySQL details noted earlier.

**Please Note:** *When installing, some hosts for some odd reason tend to put a space before "localhost" in the Server Name/Adress box, but please delete the space otherwise it will create error messages.*

- 3) Once you hit the submit button you should see the installation progress Message.
- 4) Once you get the message that the Script Installation was successful - you can remove the entire "install" folder off of your server.

Now you are ready to use this Ping Script!

**Admin Login URL is:** <http://mysite.com/pingscript>

**P.S.:**

- 1) DO remember to delete the "install" folder without fail after installing the script.**
- 2) "pingscript" folder should be writeable on your server as the configuration file (config.php) will be created during the Installation process.**

If you have any issues along the way, simply redo all the steps and if it still does not work out for you, simply contact us at [support@pingautomatic.com](mailto:support@pingautomatic.com) or directly at <http://pingautomatic.com/support> and we will get back to you ASAP!
