Introduction:

This user manual provides comprehensive user documentation of PlagiarismCheckerX.

PlagiarismCheckerX is one of the leading content scanning tools that helps you detect plagiarism generates in your documents/assignments/research papers. You can check your contents for originality before submitting them to teachers/publishers. When you load a document in the software, it scans it and shows the percentage of text copied.

Comparative studies have found that PlagiarismCheckerX is pretty fast and highly accurate as compared to alternatives. Users can check online plagiarism, compare multiple documents relative to each other, and check the content originality of their websites/blogs. Therefore, the software becomes the priority plagiarism detector for students, bloggers, teachers, webmasters, editors, and online publishers.

You may also be interested in using other sources of information.

Help:

Troubleshooting section is available in the software's main dashboard. A user can simply learn about a bunch of information about the product by clicking on the help tab.

Frequently Asked Questions Section:

On PlagiarismCheckerX website (<http://plagiarismcheckerx.com>) you can also find a comprehensive and well elaborated FAQ section. You can access this section in Support/FAQ section in the top menu of the website. Basic technical and non-technical questions are answered there.

PlagiarismCheckerX Website Support Center:

Alternatively, you can also check PlagiarismCheckerX website for information about the features and trouble shooting. In the support section, you can find contact us page that enables you to directly interact with the team.

Email Support:

Finally, if you are unable to use any of the given method for a given reason; use our email support@plagiarismcheckerx.com to contact us. Share your question or suggestion and receive professional response within next 24 hours.

PlagiarismCheckerX Installation Requirements

Operating Systems Supported:

- Windows XP Home Edition
- Windows XP Professional SP2
- Windows XP Professional x64 Edition SP1
- Windows Vista (x86 and x64, all editions)
- Windows 7 (x86 and x64, all editions)
- Windows 8 (x32 and x64)

Minimum System Requirements:

- 512 MB RAM
- 1.0 GHz or faster processor
- 30 MB free hard drive space
- Microsoft Internet Explorer 6.0 or higher
- Internet access with Broadband connection
- Microsoft Windows® 8/7/VISTA/XP (32-bit and 64-bit)

Recommended System Requirements:

- 1 GB RAM
- Administrator Rights
- 1.8 GHz or faster processor(s)
- 30 MB free hard drive space
- Microsoft Word 2003 or Above
- Microsoft Internet Explorer 8.0 or higher
- Internet access with Broadband connection
- Microsoft Windows® 8/7/VISTA/XP (32-bit and 64-bit)

Quick Start Guide:

PlagiarismCheckerX startup guide covers all key technical and non-technical subjects related to the software and its usage. Additionally, it will help users learn how to download, install and use the premium desktop application.

Before anything else, make sure that your system/laptop/personal computer meets the minimum/recommended system requirements outlined earlier.

Install Plagiarism checker X:

Once you download the product on your system, install the executable file on your operating system. In order to do this, a user will have to fill out a given form. There is no need to be technically much sound, to operate the installation as it is very easy to do that.

After Installation:

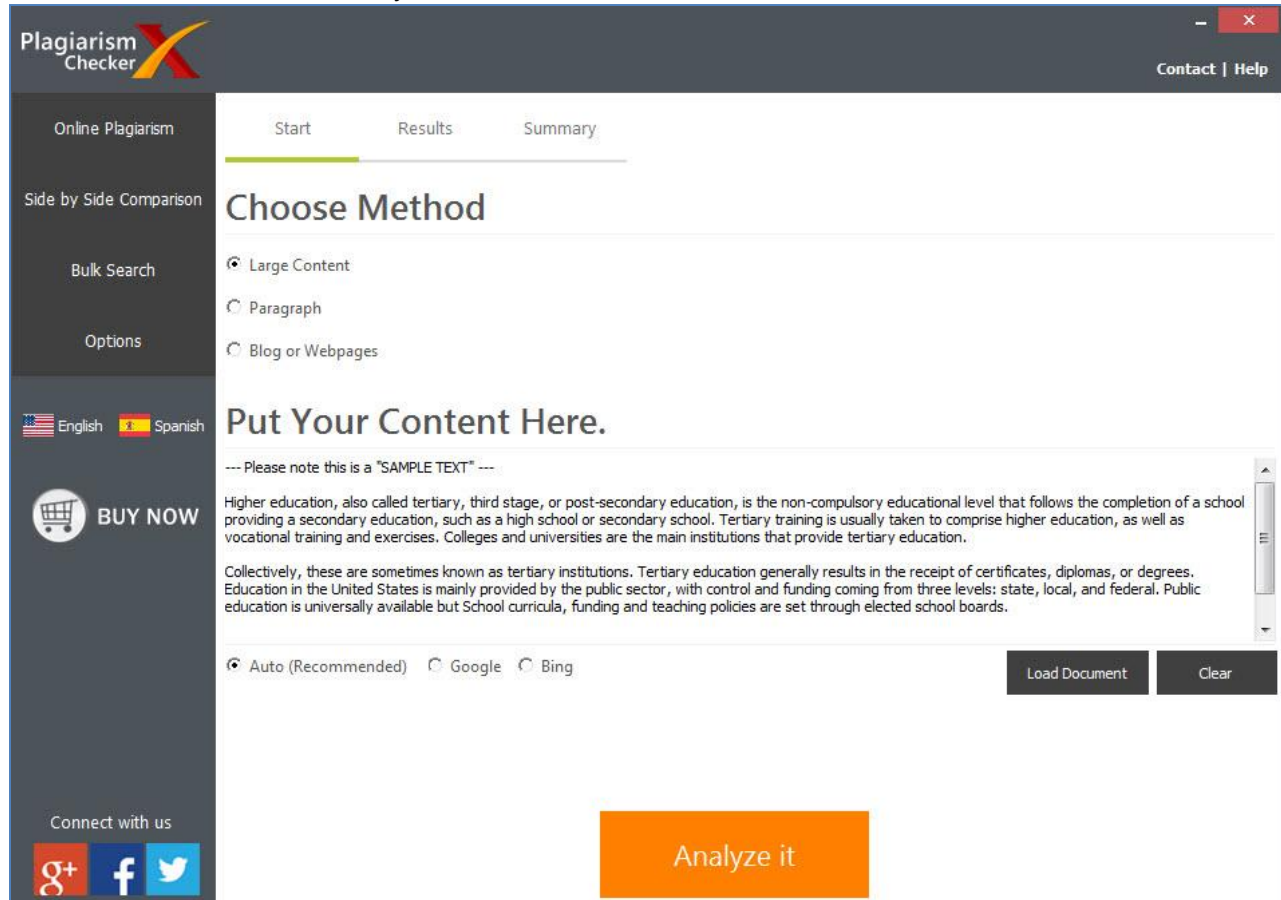

Once you are done with the installation process, a small screen (like the one given below) will show the 'Limited Trial Version' of the software. If you have a paid version of PlagiarismCheckerX, click on the 'Enter Key' section and paste your product key. Contrary to this, by clicking on 'Buy Now', you can go for a premium product subscription to enjoy numerous advantages and unlimited content scanning facility.

PlagiarismCheckerX User Interface:

Once you have installed PlagiarismCheckerX, double click on the icon of software and you will have its user interface before you.

Normally, the interface has the following key elements on its top front.

- ❖ Online Plagiarism
- ❖ Side By Side Comparison
- ❖ Bulk Search
- ❖ Options
- ❖ Help

How to Use the Software?

Looking at user interface, you can decide your nature of usage and need. By default, you have 'online plagiarism' tab opened before you.

There are three tabs below, as you can see in the interface:

1. Check your document
2. Check your paragraph
3. Check your Blog or webpages

A screenshot of the Plagiarism Checker X web application interface. The interface has a dark grey header with the logo and navigation links. Below the header, there are three tabs: 'Online Plagiarism' (highlighted with a red circle), 'Start', 'Results', and 'Summary'. The 'Online Plagiarism' tab is active, showing a 'Choose Method' section with three radio buttons: 'Large Content' (selected), 'Paragraph', and 'Blog or Webpages'. Below this is a 'Put Your Content Here.' section with a text area containing sample text about tertiary education. At the bottom of the text area are three radio buttons: 'Auto (Recommended)' (selected), 'Google', and 'Bing'. To the right of the text area are two buttons: 'Load Document' and 'Clear'. At the bottom center is a large orange button labeled 'Analyze it'. On the left side, there is a sidebar with links for 'Side by Side Comparison', 'Bulk Search', and 'Options', along with language selection (English/Spanish) and a 'BUY NOW' button.

Use the most appropriate option for you and hit 'analyze it' to receive the report. If you have a document, click on 'load document' option and hit analyze it. Contrary to this, for 'paragraphs' or website checking, go for the suitable tab.

In the next pages, every option is being described in a little detail.

Check Your Paragraphs:

In 'check your paragraph' option, either paste your content or use 'load document' option and then click on 'analyze it' button.

On the bottom left side, you can see the names of leading search engines. We recommend using 'auto flipping' of search engines and let the software automatically detect content on a given search engine though you can select a preferred one.

The report would look similar to the screenshot given below.

The screenshot shows the Plagiarism Checker X web application interface. On the left is a dark sidebar with navigation links: 'Online Plagiarism', 'Side by Side Comparison', 'Bulk Search', 'Options', 'English' (with a US flag), 'Spanish' (with a Spanish flag), a 'BUY NOW' button with a shopping cart icon, and social media links for Google+, Facebook, and Twitter. The main content area has a top header with the 'Plagiarism Checker X' logo and 'Contact | Help' link. Below the header are three tabs: 'Start' (active), 'Results', and 'Summary'. The 'Start' tab contains a 'Choose Method' section with three radio button options: 'Large Content', 'Paragraph' (selected), and 'Blog or Webpages'. Below this is a 'Put Your Content Here.' section with a text area containing sample text. At the bottom of the text area are three radio button options: 'Auto (Recommended)' (selected), 'Google', and 'Bing'. To the right of these options are 'Load Document' and 'Clear' buttons. At the bottom of the main area is a large orange 'Analyze it' button. The bottom of the sidebar shows 'Remaining Characters: 14'.

Check Your Webpages:

With the help of PlagiarismChecker, webmasters, online media professionals, bloggers, and internet marketers can detect plagiarism in a given webpage. Simply click 'check your webpages' option.

Once you have selected the particular option, paste the given URL in the window before you, and hit '**Analyze it**'. This plagiarism detector will check every sentence in the search engines and show the report similar to the screenshot.

The screenshot shows the Plagiarism Checker X web application interface. On the left sidebar, the 'Options' menu is expanded, and the 'Blog or Webpages' option is selected and highlighted with a red circle. The main content area has a 'Choose Method' section with three radio buttons: 'Large Content', 'Paragraph', and 'Blog or Webpages' (which is selected). Below this is a section titled 'Put Your Content Here.' with a large text input field. A red rectangle highlights the input field, and a red circle highlights the 'Blog or Webpages' radio button. Below the input field, there are radio buttons for 'Auto (Recommended)', 'Google', and 'Bing'. To the right of these are 'Enter URL' and 'Clear' buttons. At the bottom center, there is a large orange button labeled 'Analyze it'. The top of the interface shows the 'Plagiarism Checker X' logo and navigation links for 'Contact' and 'Help'. The bottom of the interface shows social media links for Google+, Facebook, and Twitter.

A small window with '**Do you want to view the report**' will open that has a detailed HTML report of your intended URL.

Here, you can see the level of plagiarism in a particular sentence relative to the given webpages. You can easily check the original sources of the content. Customers can save the report on their machine to view it later.

View all sources section will give you a list of websites that have the particular content. In the detailed content you can check every sentence by hovering mouse over it.

Check Your Documents/Assignments:

PlagiarismCheckerX enables you to scan your written contents. The software is compatible with almost all leading textual file formats. The leading popular file types like *.Docx, *.Doc, *.Txt, *.HTML, *.RTF, and documents in a text format can be checked. Furthermore, the documents whose syntax is in Multilanguage format (English, French, German, Russian, and Dutch) can be uploaded.

Select '**Large Content**' option and upload document by clicking on '**Load Document**' option. The documents' content is loaded into the provided area. When you click on the 'Analyze' button, the system will check results online for duplicate results.

The given screenshot shows the mock view of the same.

The screenshot displays the PlagiarismCheckerX web application interface. On the left is a dark sidebar with navigation links: 'Online Plagiarism', 'Side by Side Comparison', 'Bulk Search', 'Options', language flags for 'English' and 'Spanish', a 'BUY NOW' button with a shopping cart icon, and social media icons for 'Connect with us' (Google+, Facebook, Twitter). The main content area has a top navigation bar with 'Start', 'Results', and 'Summary' tabs. Below this is a 'Choose Method' section with three radio button options: 'Large Content' (selected), 'Paragraph', and 'Blog or Webpages'. Underneath is a 'Put Your Content Here.' section containing a text area with placeholder text about a US-based company for clinical trials recruitment. Below the text area are three radio button options: 'Auto (Recommended)', 'Google', and 'Bing'. At the bottom right of the text area are 'Load Document' and 'Clear' buttons. At the very bottom center is a large orange 'Analyze it' button.

Here again, we recommend you to use 'auto' option to let the software automatically flip the search engines though you can select your preferred search engine.

You can view the detected results by clicking on results tab.

The duplicate text is highlighted in various colors that indicate the level of plagiarism with regards to a particular website.

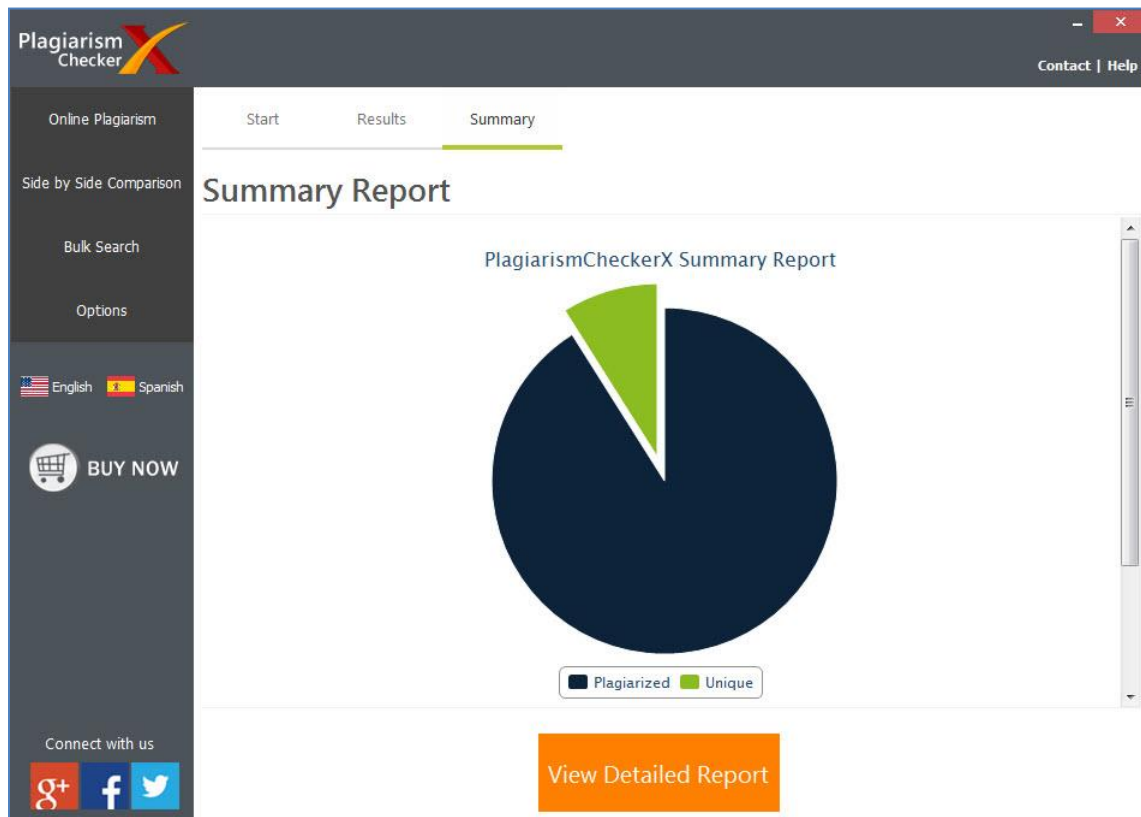

The colors indicate the following:

- **Blue** - 1-19% matching text
- **Green** - 20-39% matching text
- **Yellow** - 40-59 % matching text
- **Pink** - 60-100% matching text

Evaluation of Dynamic p-y Curves Considering Response of Pore water pressure during Earthquakes

Abstract: While evidence in the previous studies indicates that, the p-y resistance of piles in liquefiable ground is significantly reduced during pore water pressure build-up. To investigate this issue, a single pile foundation in liquefiable soils composed of liquefiable sand and overlying soft clay was subjected El Centro and sinusoidal shaking motions. A key goal in the test program was to develop a data set capable to provide insight into the mechanisms of soil-pile interaction in liquefying sand and construction of p-y curves of liquefied soil under different shaking loading conditions. **As such, results presented focus on the dynamic p-y curves back calculated from bending moment distributions at the achieved excess pore pressures.** Parametric studies have been carried out to understand the effect of pile stiffness ratio, and pore water pressure response around the pile and **86 % duplicate content found on http://ascelibrary.org** A set of test data was produced from this testing series, which will be useful for more subsequent design efforts.

Keywords: Liquefaction; dynamic p-y; Pile stiffness ratio; lateral resistance; El Centro ; Shake-table test

1 Introduction

It was a common phenomenon that pile foundations were damaged by soil liquefaction during earthquakes (Abdoun et al., 2002; Boulanger et al., 1999). In particular, most of the pile damage is believed to be associated with ground displacement induced by soil liquefaction and / or lateral ground spreading. **This suggests that the effect of soil displacement should be properly taken into account in seismic design of pile foundations.** Prediction of the dynamic p-y behaviors in liquefiable soils is difficult but achievable (Finn and Fujita, 2002). There are some methods, including experimental investigation and numerical simulation, which could be utilized to predict such behaviors defined as the relationship of lateral resistance with relative displacement between soil and pile, using a large number of experimental data (Kagawa, et al., 1994).

By clicking on the ‘**view all sources**’ users can easily identify all the web sources that have the similar content.

Side By Side Comparison:

PlagiarismCheckerX protects your unique and valuable content. You can use its 'similar content search' module to check for similar text or similar content from paragraph to another. Simply add a set of paragraphs in the sections provided manually or import a file containing some text.

If you want to interchange the paragraphs just click the '**Flip**' button to swap the paragraphs.

The screenshot shows the 'Side by Side Comparison' module of the PlagiarismCheckerX application. The interface is divided into a left sidebar and a main content area. The sidebar contains navigation links for 'Online Plagiarism', 'Side by Side Comparison' (which is highlighted), 'Bulk Search', and 'Options'. It also displays language selection buttons for 'English' and 'Spanish', a license notice 'License is Registered to Shahrukh Anwar', and social media icons for Google+, Facebook, and Twitter. The main content area has a header with 'Start' and 'Keywords' tabs. Below this is a large text input area titled 'Paste your Content Here'. It contains two text boxes: the left one has sample text about 'ABC College for Women', and the right one has a paragraph about the college's history. A 'Flip' button is positioned between the two text boxes. Below the text boxes are 'Import', 'Clear Highlighting', and 'Clear' buttons for each side. At the bottom, there are checkboxes for 'Matching Limit' (set to 3), 'Case Sensitive', and 'Clean Invalid Spaces' (checked). A large orange 'Scan Now' button is located at the bottom right.

To view the similar keyword phrases you will just click the 'Scan Now' button and the stats will show some percentage amount of duplicate phrases. Also the text in paragraphs will be highlighted with different colors showing duplication of keywords. See the screen shot below:

The screenshot displays the Plagiarism Checker X web application interface. The top navigation bar includes the logo, a 'Contact | Help' link, and tabs for 'Start' and 'Keywords'. The main content area is titled 'Paste your Content Here' and features two text input fields. The left field contains a paragraph about 'ABC College for Women', and the right field contains a paragraph about the 'University's efforts in higher education'. Both paragraphs have several phrases highlighted in different colors (green, yellow, red) to indicate keyword duplication. Below the input fields are buttons for 'Import', 'Clear Highlighting', and 'Clear'. A 'Flip' button is positioned between the two text areas. At the bottom, there are checkboxes for 'Matching Limit' (set to 3), 'Case Sensitive', and 'Clean Invalid Spaces'. The 'Status' section shows a green bar for '70%' and a red bar for '30% Duplicate'. A large orange 'Scan Now' button is circled in red in the bottom right corner. The left sidebar contains links for 'Online Plagiarism', 'Side by Side Comparison', 'Bulk Search', and 'Options', along with language selection (English, Spanish) and social media icons.

For bloggers and search engine optimization professionals, this module can be very useful. It can generate reports of keyword phrases by 'Export a CSV' and 'Export HTML'. You just have to click the buttons on the screen and it will generate the reports of your desired keywords.

Buttons: View Report, Export CSV, Filter, Scan Density

You can also look at the Keywords and their brief report using "View Report" button.

Bulk Search:

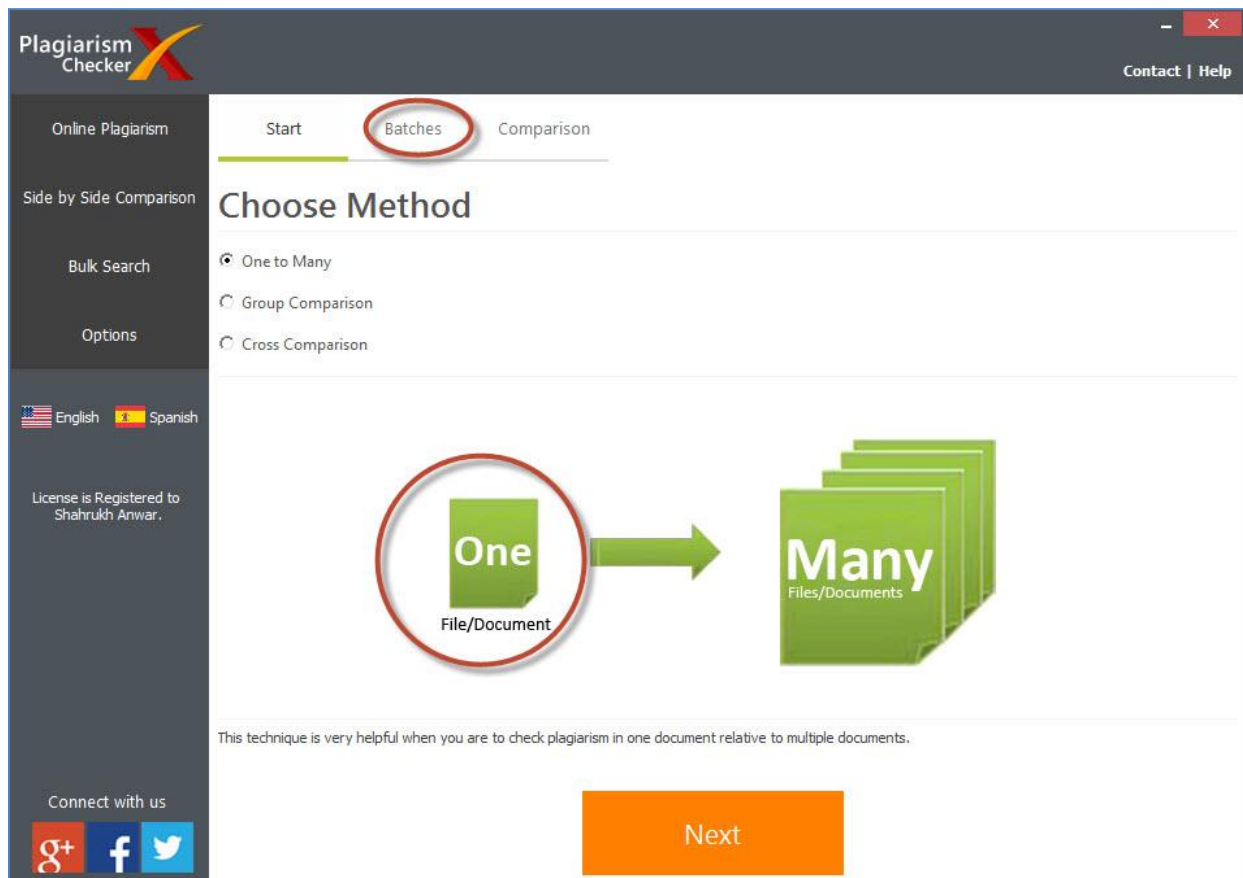

PlagiarismCheckerX has a unique advantage over many alternatives owing to this feature. The software has a distinctive feature to check particular documents against each other for plagiarized content. This is very handy tool for teachers, who have to cross check the assignments of the entire class relative to each other. Similarly, the website publishers/web masters can check multiple contents before publishing them on their website.

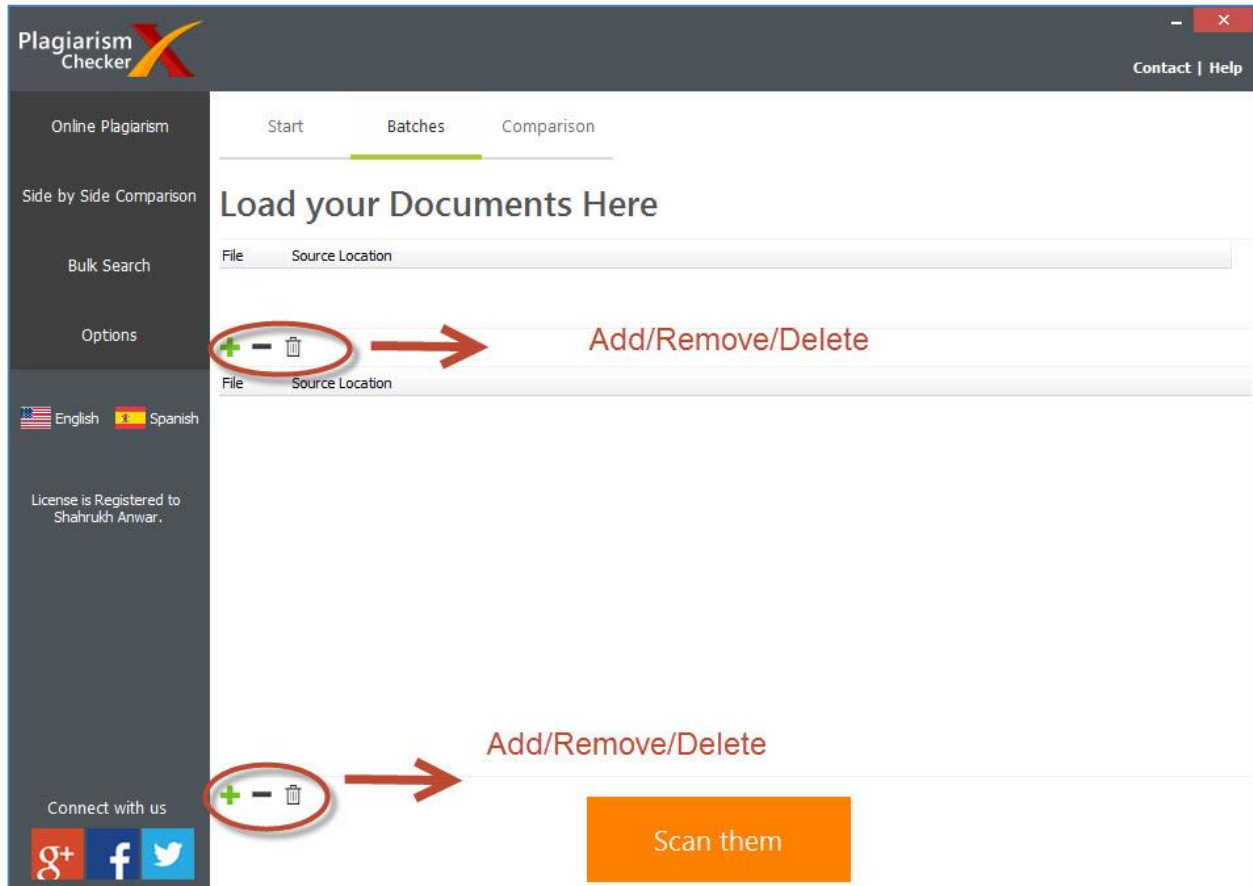

Scanning Options in Bulk Search Facility:

- Simple (One to Many)
- Group Comparison
- Cross Comparison

You will click on '**Bulk Search**' button  to work on this module. One can simply add files by clicking on "**Batches**" button or "**One**" button. Similarly, there are '**add, remove and delete files**' options to support you during the process.

Once you are done with adding multiple documents, (as shown in the given screenshot), simply click on '**Scan them**' button.

Once you have clicked the **'Scan'** button your respective documents will be processed and you can generate report of the documents scanned and compared via **'View Report'** button. The report will be saved in HTML format, and you can view it later on your machine. The colors indicate the level of plagiarism, as we have already discussed in previous section. See a couple of screenshots to understand better.

Save
Print

Please Note: If report is not showing properly then save it and view it in other browsers. Recommended (Chrome, Firefox).

Summary Report by Plagiarism Checker X

Creation Date: Friday, January 10, 2014
 Creation Time: 3:00:02 PM
 Total Words: 14146
 Total Documents: 3

Files	BRDTemplate.doc
Use Cases.pdf	0 % Duplicate
Writing a Software Requirements Document.pdf	0.67 % Duplicate

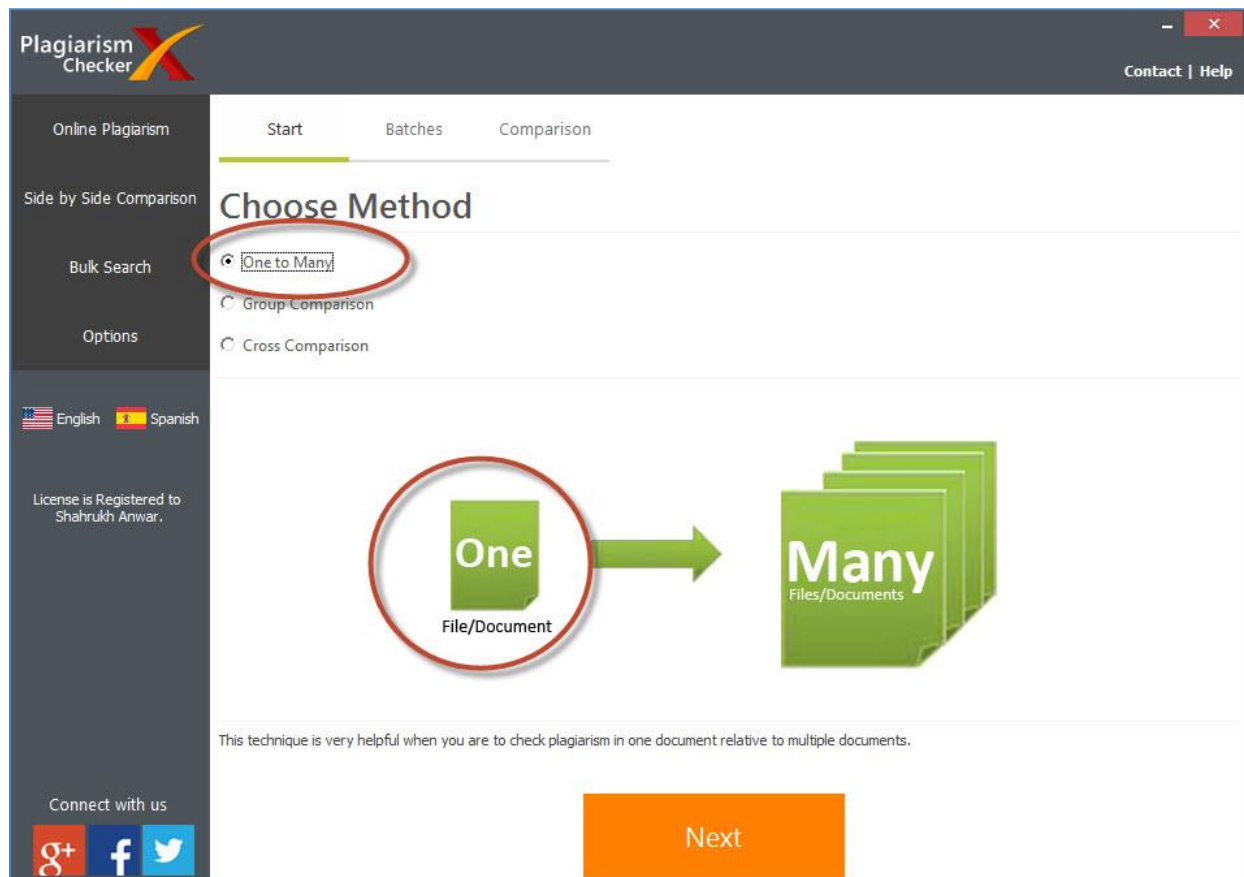

Files	Past Papers.doc	My Articles.doc	Old Articles.doc	Class Assignment.rtf
1 Past Papers.doc	Empty	12.27 % Duplicate	12.27 % Duplicate	27.69 % Duplicate
2 My Articles.doc	22.69 % Duplicate	Empty	71.55 % Duplicate	48.52 % Duplicate
3 Old Articles.doc	22.69 % Duplicate	71.55 % Duplicate	Empty	48.52 % Duplicate
4 Class Assignment.rtf	11.84 % Duplicate	7.8 % Duplicate	7.8 % Duplicate	Empty

Simple (One to Many):

This option will facilitate you to check a particular one document against many (several) documents. See below screen shot for more clarification.

Add one file by click on 'Add file'  button, in "Batches" tab then click 'Next'

Once you have clicked the next button, now you can add multiple documents and click '**Scan**' button. The software will check the individual document against the multiple documents uploaded and will deliver the results.

The screenshot shows the Plagiarism Checker X web application interface. The top navigation bar includes the logo, a 'Contact | Help' link, and window control buttons. The left sidebar contains links for 'Online Plagiarism', 'Side by Side Comparison', 'Bulk Search', 'Options', language selection (English/Spanish), license information, and social media links. The main content area has tabs for 'Start', 'Batches', and 'Comparison', with 'Comparison' being the active tab. Below the tabs, there's a 'Scanned Documents' section with a 'Double Click (Preview)' toggle set to 'OFF'. A table displays the results of a scan:

Files	dt brd.doc	Functional Req...
Software Test Plan Template.doc	0.79 % Duplicate	0.72 % Duplicate

At the bottom right of the main content area, there is an orange 'View Report' button.

Group (Many to Many):

Suppose you want to check multiple documents content against several documents, then how PlagiarismCheckerX can help you?

Simply add multiple documents by using ‘Add files’ button or by Green buttons shown in the image below. Repeat the same process as described in the last section and press “**Scan them**” button.

The screenshot displays the PlagiarismCheckerX web application interface. On the left sidebar, the 'Options' menu is expanded, and 'Group Comparison' is selected and circled in red. The main content area is titled 'Choose Method' and shows three radio button options: 'One to Many', 'Group Comparison' (selected), and 'Cross Comparison'. Below these options is a diagram illustrating the 'Group Comparison' method: a stack of green boxes labeled 'Many Files/Documents' is circled in red, with a green arrow pointing to another stack of green boxes labeled 'Many Files/Documents'. Below the diagram, a text box explains: 'In this selective methodology, users can detect plagiarism in the form of side by side repositories.' An orange 'Next' button is positioned at the bottom right of this section.

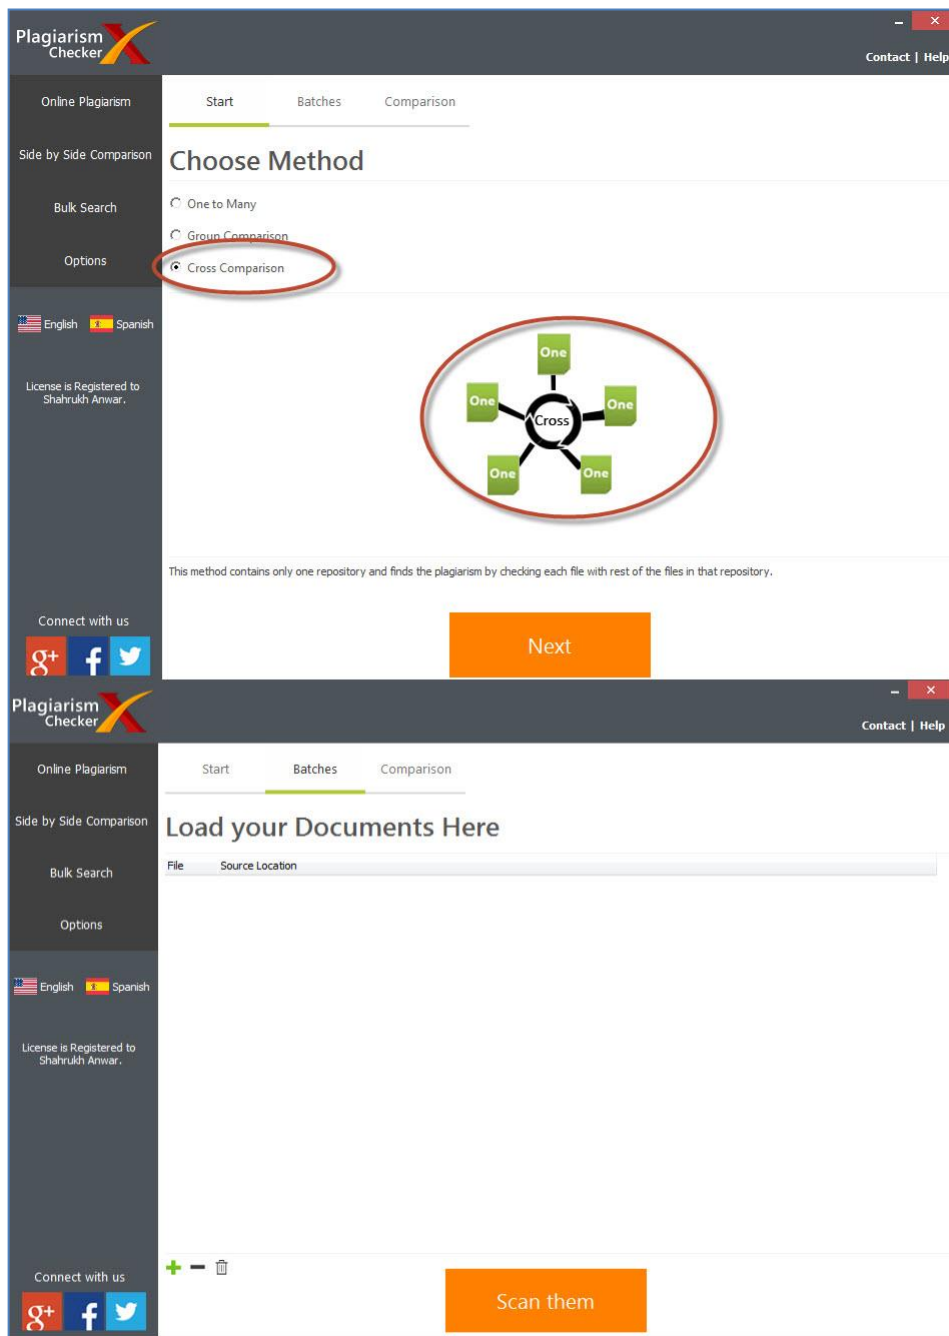

The second section, 'Load your Documents Here', is shown below. It features a table with two columns: 'File' and 'Source Location'. There are three rows in total, each with a green plus icon in a circle (circled in red) to the left of the 'File' column, indicating where to click to add a document. An orange 'Scan them' button is located at the bottom right of this section.

Cross Comparison (Many to Many):

Suppose you want to cross check multiple documents content against several documents, then how PlagiarismCheckerX can help you?

Simply add multiple documents by using 'Add files'  button or by Green buttons shown in the image below. Repeat the same process as described in the last section and press “Scan them” button.

After the scanning you will be shown computed results like this. You can now easily verify that which documents are containing high plagiarism and which documents are unique.

Frequently Asked Questions:

What is PlagiarismCheckerX?

PlagiarismCheckerX is a premier content scanning tool that helps users identify the level of plagiarism in their content. With three times higher speed and accuracy, this desktop application has been serving the market for the past 6 years.

What is Online Plagiarism Checking?

Online plagiarism checking is a service provided by PlagiarismCheckerX. In this feature, users can check the availability of their content in the search engine's index. It helps students/writers/researchers avoid any copyright violation.

Do You Save My Documents/Assignments?

No, absolutely not. PlagiarismCheckerX is very different from other online plagiarism checkers that require you to upload the assignments in their system. In this desktop application, you just copy and paste the content to help it analyze availability of the same in search engines' index. So, the document is just used for scanning while it remains stored on your machine. PlagiarismCheckerX ensures your data security strictly and ensures proper privacy.

Do You Check For Grammar Also?

At this moment, our services are just focused on quality scanning of the content for plagiarism only. PlagiarismCheckerX helps you write/submit original articles/assignments.

Is PlagiarismCheckerX FREE to Use?

Yes, you can download the product and use its basic version for FREE. However, to enjoy all features and premium benefits, we recommend you to upgrade to annual subscription plan.

How Many Times Can I Check the Paper for Plagiarism?

There is absolutely no limit. Whether you are using the 'free version' of PlagiarismCheckerX or the paid one, there is no limit on checking. Yes, free version does not provide all product features. For details, you can look at the subscription plans.

How Large Documents Can Be Checked With PlagiarismCheckerX?

Unlike other available plagiarism checkers, PlagiarismCheckerX does not impose any 'limit' of papers or quantity of words. Be it simple online checking or bulk work, you can check a great amount of words/pages in one jump. Yes, if you will upload more than a fair amount of pages, the software might go a little slow. Therefore, we advise you to check large assignments in sections/pieces.

Which File Formats Are Supported By PlagiarismCheckerX?

PlagiarismCheckerX is quite comprehensive tool that is compatible with a range of file formats. You can upload all 'textual' files. Here, .txt .doc, .docx, .rtf, .html and many others formats can be uploaded for scanning.

Contact Us:

Though all technical information has been listed in the manual and other helping sections on the website, still there are possibilities of some individual case.

If you have any comment, feedback, or question; come and ask the technical/support team of PlagiarismCheckerX. Whether your question is regarding application, its installation, configuration, usage, purchase, or registration; feel free to contact us. We normally get back to you within 12-24 hours.
